NARESH CHALLA

Java Full Stack Developer | React.js • Spring Boot • MySQL
nareshchalla2220@gmail.com | +91 7095432678 | Amberpet, Hyderabad | LinkedIn Profile

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on, project-driven experience building scalable web applications using React.js, Spring Boot, and AWS — including an independently designed and deployed production news portal and a freelance-delivered job portal with a rule-based candidate matching engine. Currently gaining enterprise process and quality-control experience at Wipro while actively transitioning into a full-time technical role. Proven ability to improve application performance by 25% through backend optimizations. Passionate about clean code, REST API design, and delivering seamless user experiences.

TECHNICAL SKILLS

Languages: Java (8/11/17), HTML5, CSS3, SQL
Frontend: React.js, Hooks, State Management, Tailwind CSS, Bootstrap
Backend: Spring Boot, Spring MVC, Spring Security, JWT, Hibernate ORM, REST APIs
Databases: MySQL, PostgreSQL
Cloud/DevOps: AWS (EC2, RDS, S3), Nginx, SSL/Domain Configuration, Linux, Git
Tools: Maven, Postman, IntelliJ IDEA, VS Code, JUnit

WORK EXPERIENCE

Senior Associate – SME – Trust & Safety (Non-Technical) | Wipro, Hyderabad July 2024 – July 2026

- Reviewed and validated high-volume operational data for a high-priority enterprise client within the Trust & Safety function, ensuring policy and quality compliance
- Maintained 100% accuracy in client reporting
- Performed systematic data validation and quality control, significantly reducing reporting errors
- Collaborated cross-functionally with technical and business teams to streamline enterprise workflows

Java Full Stack Developer Intern | Remote April 2023 – February 2024

- Contributed to full-stack e-commerce platform development using Java and Spring Boot for backend services
- Improved application response times by 25% through backend logic refinements and query optimization
- Developed unit tests using JUnit to ensure reliability of core business logic
- Built and integrated UI components with RESTful API endpoints for seamless frontend-backend communication

KEY PROJECTS

Ap13news – News Portal Website — React.js • Spring Boot • PostgreSQL • AWS (Self-Driven)

- Developed and deployed a full-stack, live news portal — hosted in production at ap13news.in — enabling users to browse, search, and read categorized news articles in real time
- Deployed and self-managed the Spring Boot backend on an AWS EC2 instance, configuring Nginx as a reverse proxy with SSL for secure custom-domain hosting
- Built dynamic, responsive frontend using React.js with component-based architecture for smooth content rendering
- Designed RESTful APIs using Spring Boot to serve news content and manage backend business logic, secured with JWT authentication
- Migrated application data to a cloud-hosted PostgreSQL database, optimizing queries for fast, structured storage and retrieval of articles, categories, and user data

Talent Bridge – Job Portal (Freelance) — React.js • Spring Boot • MySQL • Spring Security

- Designed and built a full-stack job portal as a freelance project, with role-based access for Admin, Recruiter and Job Seeker, using Spring Boot 3 REST APIs and a React 19 frontend
- Implemented stateless JWT authentication with Spring Security, BCrypt password hashing, and email OTP verification and password reset
- Built a rule-based matching engine that scores applications on skills, experience and qualification using recruiter-defined weightages, auto-shortlists candidates, and powers a pre-apply eligibility checker
- Developed resume upload (PDF/DOC/DOCX) with automatic skill extraction using Apache PDFBox and POI, with JPA/Hibernate and MySQL for jobs, applications, resumes and messaging

Happy Shopping – E-Commerce Application — React.js • Spring Boot • MySQL • Tailwind CSS (Self-Driven)

- Led full frontend development using React.js, delivering a dynamic, Flipkart-inspired responsive UX
- Built mobile-first UI with Tailwind CSS covering product catalogs, shopping carts, and user dashboards
- Integrated React frontend with Spring Boot REST APIs for real-time product management and secure checkout
- Managed relational data using MySQL for persistent storage of user, product, and order information

Corporate Portfolio Website — React.js (Self-Driven)

- Built personal showcase using React with component-based architecture and optimized rendering across all screen sizes

EDUCATION

B.Tech – Electronics & Communications Engineering
St. Mary's Engineering College, Hyderabad — 2023
Intermediate
Govt Junior College, Hyderabad — 2018
